: Thumbnail image added

Installation/Upgrade

Install it as you would a normal DNN Module; no other configuration is needed.

Configuration

1. Add an instance in a page.
2. Select "Edit Flash Settings" for module menu, Flash settings wizard dialog will open. The first is "General settings"

▼ Flash settings wizard

The screenshot shows the 'Flash settings wizard' with the 'General Settings' tab selected. On the left is a sidebar with links: 'General Settings', 'Flash Settings', 'Play Lists', and 'Finish'. The main area is titled 'General Settings' and contains several configuration options:

- Choose play mode:** A group of radio buttons with the following options:
 - Numeric navigate (classical)
 - Numeric navigate (integrative)
 - Numeric navigate (black)
 - Numeric navigate (extension)** (selected)
 - Numeric navigate (button free)
- View Template:** A dropdown menu showing 'default/ViewTemplate_Standard'.
- Flash Width:** A text input field with the value '400'.
- Flash Height:** A text input field with the value '200'.
- Flash background color:** A text input field with the value '0x006699' and a color picker icon.
- Flash Align:** A dropdown menu showing 'Left'.
- Flash wmode option:** A dropdown menu showing 'Transparent'.
- Link Target:** A dropdown menu showing 'Self Window'.

At the bottom of the main area is a link: **Play mode selection tips**.

Expand "Play mode selection tips" will see more detail information.

3. In 'Flash Settings" section, you can control settings for flash player.

The screenshot shows the 'Flash settings wizard' with the 'Numeric Navigate Settings' tab selected. On the left is a sidebar with links: 'General Settings', 'Flash Settings', 'Play Lists', and 'Finish'. The main area is titled 'Numeric Navigate Settings' and contains three configuration options:

- Rotator Interval(sec):** A text input field with the value '5'.
- Image Title Height:** A text input field with the value '18' and a note 'Set it to zero'.
- Text Align:** A dropdown menu showing 'Center'.

Numerics navigate settings.

☒ Dynamic Generate

Dynamic Generate From Folder

Dynamic Generate mode enables you create gallery more quickly. It will automatically scan a specified folder and i checked), picking up all related files. Whenever files are changed,it will automatic refresh. It makes things more eas, folder , and then maintain its files through other tools(like ftp software), item list will automatic changed.

Check "recursive" option to scan recursive. If you want to exclude some folders while retrieving,input its name in multiple folders.For example ,enter "Album1,Album2" to exclude these two folder while generating gallery.
