# 1. Introduction

Cross Video Gallery 6.4 enables multiple users publish their video/audio and attach image/document as easy as ABC. It includes 12 sub modules which offer many cool features, as follows:

1. Supports both HTML5 & Flash player to play your videos/audios. It automatically selects the best playback for your viewer's device and browser, so you deliver unparalleled video/audio experience on iPhone, iPad, Android, Mobile, and the Desktop.
2. Video/audio can be from site file, embed code, or external urls (like YouTube) and RTMP streaming. They can be published as stand-alone medias, or publish as serials so visitors can watch/listen them one by one. Module also supports ad video.
3. Automatic imports YouTube videos (like user upload /favorite/play list, or search based certain condition) into user video list.
4. Multiple users support, authorized users can post their own videos/audios and attach photos/documents with them.
5. Each user can manage his files. Module supports automatic conversion of user uploaded videos to .flv or .mp4 (h264) format.
6. Amazon Simple Storage Services (Amazon S3) support.
7. Upload multiple/large files at one time using Ms Silverlight upload control.
8. All display interfaces are template based.
9. Disable unwanted video/audio attributes, or create additional media attributes as your wish.
10. RSS/Email integrates.
11. There are 12 sub modules in package, but all data are manage via 1 single module (CrossVideo\_Admin), the other 11 sub modules are used to display information.
12. Fully integrates with dnn built-in journal. When a new video/audio/comment is created, it will automatic be added in author journals.
13. Integrate with dnn built-in social, author can share video/audio to his/her friends/followers and groups.
14. Seo friendly url/Google website map/Google video sitemap support to let search engines index your videos/audios more easily.

## 15. Google Maps integration.

.....

Visit <http://DnnModule.com/FreeDownload.aspx> to download 60 days trial version which can be installed on official domain names. And visit <http://DnnModule.com/Modules/CrossVideoGallery/VideoList.aspx> and <http://dnnmodule.com/Modules/CrossVideoGallery/AudioList.aspx> for live demo.

Note, Cross Video Gallery v6.4 requires DNN 7.0+, if your sites are still under DNN 5.x/6.x, please check other old versions at <http://DnnModule.com>.

## 2. What's new in **v6.4**

1. Supports both HTML 5 & Flash player.
2. Improve YouTube video support.
3. Captcha added to prevent spam.
4. Improve ad video support.

## 3. Requirements

1. DNN7.0+.
2. Sql server 2008/2012 or sql express 2008/2012.
3. Asp.net framework 4.0+.

## 4. Publish your videos/audios with Cross Video Gallery

The typical scenario involves the following steps:

Step 1. Install module.

Step 2. Add CrossVideo\_Admin sub module to manage data.

Step 3. Add gallery.

Step 4. Add categories.

Step 5. Add video.

Step 6. Add CrossVideo\_List sub module to display your videos.

### 4.1 Step 1: Install module

If you already bought module, unzip package which you download, you will see CrossVideoGallery 6.4 Pa(Standard).zip (or CrossVideoGallery 6.4 Pa(Enterprise).zip if you bought enterprise edition), choose it as install package.

If you want to trial module first, you can download "CrossVideoGallery 6.4 trial package.zip" at <http://DnnModule.com/FreeDownload.aspx>. Unzip it you will see CrossVideoGallery 6.4 Pa(trial).zip.

Click “Host - Extensions - Install extension wizard “to install module. After installation, you will see **12** sub modules.

	<b>CrossVideo_Admin</b>	Manage all data which related to Cross Video Gallery module.You only need put 1 instance per portal.	5.6.0
	<b>CrossVideo_Archive</b>	Display media archive history.	5.6.0
	<b>CrossVideo_Author</b>	Display video/audio authors.	5.6.0
	<b>CrossVideo_Category</b>	Display video/audio categories.	5.6.0
	<b>CrossVideo_Detail</b>	This module is used to display video/audio detail.	5.6.0
	<b>CrossVideo_List</b>	Display video/audio list.	5.6.0
	<b>CrossVideo_ListDashboard</b>	Display video/audio list dashboard via flash.	5.6.0
	<b>CrossVideo_Search</b>	Provides search interface for cross video gallery module.	5.6.0

### Install via Ftp

The install package is about 7 mb in size. If you have problem to upload it by click “Host - Extensions - Install extension wizard”, there is an alternative installation option you can use. Please use the following procedure:

1. Upload CrossVideoGallery 6.4 Pa(Standard).zip to Install\Module folder of your site using ftp tools.
2. Click “Host - Extensions” followed by clicking the “Available Extensions” tab. Install “CrossVideo\_Admin” which is under the “Modules” section. Click the “Install” button to install.

	<b>CrossVideo_Admin</b>	Manage all data which related to Cross Video Gallery module.You only need put 1 instance per portal.	5.6.0	<a href="#">Install</a>
---	-------------------------	--	-------	-------------------------

Note, if you upgrade from trial version to official version. You don't need uninstall trial version first, simply re-install official package to overwrite existing trial files, your existing data will be kept after upgrade.

## 4.2 Step 2: Add CrossVideo\_Admin sub module to manage data

First, you may need to create a page before adding CrossVideo\_Admin sub module to it. Like below:

**My Website > Cross Video Gallery**

**Page Details** | **Permissions** | **Advanced Settings**

**Page Name:**

**Page Title:**

**Description:**

Create "Video Admin" page.

After that, add CrossVideo\_Admin sub module to the page. This module is used to manage all data in Cross Video Gallery package. You only need **1 instance** per portal.

**▼ CrossVideo\_Admin**

**Admin Control Panel**

**Configurations**

 **Global Settings**  
Manage general settings,like video convert,file storage,seo optimization,ad video,video v roles,thumbnail generate,abuse report,active social module integration,etc

 **Edit Roles**  
Specify roles which can post video/audio and manage their files.

**Data Manager**

The "Admin control panel" section is available for site administrators only.

**My Videos & Audios**

 **My Profile**  
My biography and other personal informations,like avatar email and video prot

 **My Files**  
My Files,upload them before attached with your videos(or audios).

 **My stand alone videos & audios**  
My video/audio list,publish your stand alone video/audio here.

 **My Serials**  
Serial is a group of videos/audios.You can put multiple videos/audios into a seri

 **My YouTube Rss**  
You can create rss items from YouTube(based YouTube standard feeds,User upl tag).Module will check your rss items periodically and automatic import videos f

 **Help ticket**  
Visitor help tickets to my videos/audios.

"My videos & audios" section is available for roles which have rights to post videos/audios.

## My Feedback

### My Play List

My video/audio play list, you can submit help ticket to them.

### My Reviews

My reviews to watched videos/audios.

### Help Ticket

View my submitted help tickets.

### My Abuse Reports

My abuse reports. Click to view site administrator's response.

“My feedback” section is available for all registered users.

## Help

How to start

Online Video Convert

Offline Video Convert

Flash video(.flv)/H.264(.mp4) and Silverlight upload control mime type

Config allowable upload file extensions

YouTube Integration

Faqs

Help section is available for site administrators only. We have putted a lot of information on there. We strongly recommend you read help information to learn more details about this module.

## 4.3 Step 3: Add a gallery

Click “Admin Control Panel – Data Manager - Galleries” to add galleries. Galleries are top-level unit to organize data. Each gallery has its own categories / attributes / tags / videos (audios).

### Video Departments

Update Cancel

Basic Field Enable Specification 1 Specification 2 Specificati

Department Name: Video

Image: File Location: Magazine/No1/ File Name: page00.jpg Upload New File

Media Type: Video

Order: 10

Please note, the default media type is “Video”, means user can only post videos (flv, mp4, webm..etc) to it. If you want to also post audios (mp3, ogg, aac....etc), you need create another gallery which media type is “Audio”.

Each gallery needs a separate page to display videos/audios detail which belong to it. That page must have a CrossVideo\_Detail sub module on it. Module will display a wizard page to guide you create it when you add a new gallery.

#### Media department detail page settings wizard

Note, you can also run that wizard by click “Run detail page setting wizards” button later.

Tips: some people may ask “why we need create gallery?” Well, gallery is mainly used to organize attributes/categories. For example, if you use Cross Video Gallery to publish both videos and audios, you may need to create different attributes for videos and audios, and you also need different categories to organize them. Gallery lets you solve this problem easily.

#### 4.4 Step 4: Add category

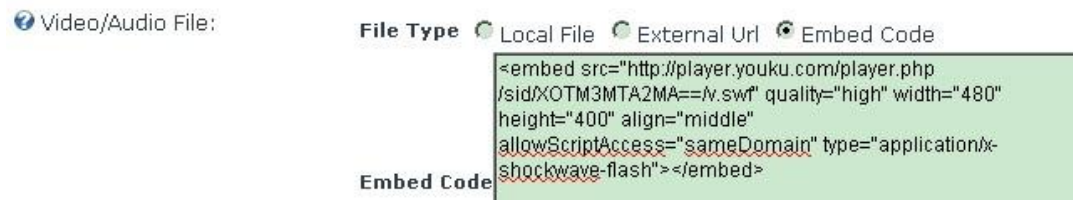

Click “Admin Control Panel – Data Manager - Categories” to add categories. You must specify at least **1 category** for each gallery. A video/audio can belong to multiple categories.

#### 4.5 Step 5: Add videos

Now you can add your videos in “My Videos & Audios – My stand alone videos & audios”, you may need to upload video/audio/image/document files in “My Videos & Audios – My Files” first. For quick start, let us add a video from embed code as example.

Click “My Videos & Audios – My stand alone videos & audios”, click “Add Video/Audio” button, enter a video title, choose “File Type “ as “Embed code “, as below.

You can copy below content as embed code

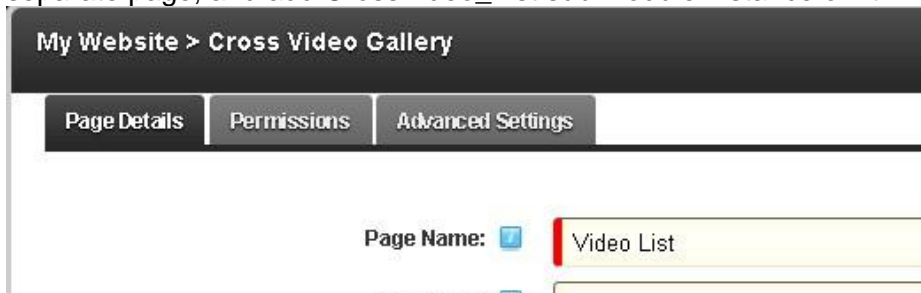

```
<embed src="http://player.youku.com/player.php/sid/XOTM3MTA2MA==/v.swf"
quality="high" width="480" height="400" align="middle"
allowScriptAccess="sameDomain" type="application/x-shockwave-flash"></embed>
```

After that, choose a category for it, click "Update" to save video.

Cross Video Gallery supports both HTML5 & Flash player to play your videos/audios. It automatically selects the best playback for your viewer's device and browser, so you deliver unparalleled video/audio experience on iPhone, iPad, Android, Mobile, and the Desktop. You will see a "Video/Audio format support" tab while adding videos/audios, please read it first before add your media.

#### 4.6 Step 6: Use CrossVideo\_List sub module to display your videos.

Now you can use CrossVideo\_List sub module to show your videos. First, create a separate page, and add CrossVideo\_List sub module instance on it.

You can add multiple instances to pages as your wish. Click "media list settings" action you will see a lot of control options to let you control the layout of video list.

## 5. Enhance your video/audio gallery

As we can see, there are 12 sub modules in Cross Video Gallery package. We talk a lot of with CrossVideo\_Admin sub module in "Publish your videos/audios with Cross Video Gallery" section. Now let's see other sub modules.

### 5.1 CrossVideo\_Detail sub module

Using this module to display video/audio detail information, you need to add CrossVideoVideo\_Detail sub module instance for every video/audio gallery. However, you don't need worry about it. Module will display a wizard page to guide you create these pages while add media galleries.

#### Media department detail page settings wizard

General  
Detail Page  
Finish

"Video" detail page

For each media department,module needs a valid page to dispaly its video/audio detail which be page should has a CrossVideo\_Detail module instance and its " Department" property must be the current department.

Would you like module create a new page and add CrossVideo\_Detail module instance for you?

☒ Yes,create a new page and add CrossVideo\_Detail module instance for me.

☐ No,I want select a existing page and add CrossVideo\_Detail module instance by myself later.

☐ I will consider it later.(You can click the "Run detail page setting wizards" later in "Department")

Of course, you can also add it by yourself if you like, as follows:

A: Create a video detail page

My Website > Cross Video Gallery

Page Details Permissions Advanced Settings

Page Name: Video Detail

Make sure page is view by all users. If you don't want this page display on menu, you can uncheck "include in menu", to hidden it.

Template Folder: Templates/

Page Template: Default

Include In Menu? ☐

Permissions:

	View Page	Edit Page
Administrators	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
All Users	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Registered	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

After page creation, add CrossVideo\_Detail sub module to this page. And click "Media detail settings" to customize its layout.

### 5.2: CrossVideo\_List sub module

Use this module to display video list. You can add many instances per portal. Click "Media list settings" to customize it.

### 5.3: CrossVideo\_ListDashboard sub module

Use this module to display video/audio dashboard via flash. You can add many instances per portal. Click "Media dashboard Settings" to customize it.

### 5.4: CrossVideo\_Search sub module

Use this module to provide media search function. You can add many instances per portal. Click "Media search settings" to customize it.

### 5.5: CrossVideo\_Taglist sub module

Use this module to display media tag list.

### 5.6: CrossVideo\_TagDashboard sub module

Use this module to display media tag dashboard via flash

### 5.7: CrossVideo\_Author sub module

Display media author list, it is useful if you have many users publish videos/audios

### 5.8: CrossVideo\_Archive sub module

Use this module to display media archive history.

### 5.9: CrossVideo\_Type sub module

Use this module to display media galleries (media type). For some reason, we call gallery as “type” in previous versions. In v5.7, we change type as “gallery” based customer’s feedback.

### 5.10: CrossVideo\_Category sub module

Use this module to display media categories.

### 5.11: CrossVideo\_WatchHistory sub module

Use this module to display registered user watch history.

## 6. Multiple users support

By default, only site administrator can post videos/audios. If you want to enable other users post videos/audios to your site, you can click “Admin Control Panel - Configurations - Author Roles” to add roles which can post videos/audios. You can specify their disk quota and video/audio count.

#### Cross Video Gallery\_Edit Roles

 Add Role

[Return my account](#)

Role Name	Disk Quote(MB)	Video Count	Import from YouTube	
Advanced Role	50	5	<input checked="" type="checkbox"/>	

## 7. Advanced configurations

Cross Video Gallery module introduces a lot of powerful features which haven't seen in other competitor modules. Instead of write long and complicated help document to explain every detail of them. We choose to integrate this information directly into module interface. Below are some important areas which you need read before use this module.

### 7.1: Convert video to .flv and h264 (.mp4) online/offline

Expand “Help – Online / Offline Video convert permission” in CrossVideo\_Admin sub module for more detail.

 Help

---

 Video convert permission

---

To convert videos,first you need download execute packages:

- 1.Visit <http://www.dnnmodules.cn/FreeDownload.aspx>,download "Execute package" for Classified Pro module.
- 2.Unzip your download files to your computer.
- 3.Copy ffmpeg and mencoder folder to DesktopModules\CrossClassified\Exe directory of your site.

Second,web server must give execute permission to DesktopModules\CrossClassified\Exe folder ,see sample image below. If you can access web server,config it as followings:

- 1.On the Windows 2003 server, open the Internet Information Services Manager.
- 2.Expand your site directory to DesktopModules\CrossClassified\exe folder,right click it,select "Properties",change its execute permission as "Scripts and Execute".
- 3.Contact your host provider if you can't access web server.

Note, we strongly recommend choose video convert target as h264 (.mp4) format because these videos can be watched via mobiles like iPhone/iPad/Android/Nokia...

### 7.2: Upload large files and play .flv/.mp4 video files.

Expand “Help – mime type” to see how to configure it:

 Help

---

 Video convert permission

---

 Flash video(.flv)/H.264(.mp4) and Silverlight upload control mime type

---

Module needs a few mime type support to work. You can add them as following if not available. Take flash video(.flv) as example.

- 1.On the Windows 2003 server, open the Internet Information Services Manager.
- 2.Expand the Local Computer Server.

### 7.3: Retrieve YouTube videos.

Expand “Help – YouTube Integration” to see how to do it.

#### YouTube Integration

You can create rss item based YouTube standard feeds /User upload,favorite,play list/or search based YouTube category and tag.Module will automatic import videos based your rss items.For example,if you create a youtube rss item which based your YouTube account upload, and when you upload a new video to YouTube, module will automatic import to Cross Video Gallery for your. However, there are something you need to know about this procedure

1.YouTube.com must be accessible before retrieve videos.

2.By default,module will check YouTube rss item every 2 hours. You can change this time period by login in as Super User, and click dnn stand menu "Host - Schedue", ar

### 7.4: Disable unwanted fields

Media has some built-in fields, like author/source/image, etc. If you don't need these fields, you can disable them in “Admin control panel – Data Manager – Galleries” of CrossVideo\_Admin sub module. If a field is disabled, then it will not display on video/audio edit interface which belong to current media gallery. And of course, it will also disappear in video list and detail module too.

Basic	Fields Enable	Specification 1	Specification 2	Specification 3	Specification 4	5
<p>Module has some built-in fields for video informations.Like "Quote/Author/Image/Source/Summary/LinkUrl/De use them for each departmen. For example, if you uncheck "Enable Author Field" option for current departmen belong to this departmen, the "Author" field will be hidden.It also will be hidden when display in video list and c</p>						
<p>Enable "Quote" Field <input type="checkbox"/> <input checked="" type="checkbox"/></p> <p>Enable "Author" Field <input type="checkbox"/> <input checked="" type="checkbox"/></p>						

### 7.5: Customize your own fields (for long content)

Module has a built-in filed: media detail to let you publish long content (text/html content). Besides that, module also supports up to 5 additional fields to let you publish long content (text/html content). You can enable them in “Admin control panel – Data Manager – Galleries” of CrossVideo\_Admin sub module. You can specify its title and default value. If a field is enabled, then it will be displayed on video/audio edit interface and detail module which belong to current gallery.

Basic

Fields Enable

Specification 1

Specification 2

Specification 3

Specification 4

Specifications are detail description of products which belong to this department.Module already has a

Besides that,module also support up 5 additional specification fields which you can customize. You can

default value.

For example, if you publish information related notebook, besides "Video detail",you may also want a  
it,you can check on "Enable" option for "Specification 1",input "Technical Detail" as its title.Then author  
videos(audios) which belong to current department. You can also specify "default value" for it so author c  
his medias.

Note, use these specification fields for long content (html based ). If you want to customize short spec  
CrossVideo\_Admin module instead.

Enabled ☒

Specification Title

## 7.6: Customize your own fields (for short content)

You can use “Admin control panel – Data Manager – Attributes” feature of CrossVideo\_Admin sub module to create extend fields. You can create attributes for varied data type like string/date/time/decimal/integer/image/url/email, and specify its title/default value/help text/ validate rules/edit style, you can also provide a list of value to let author choose while editing. After create a field, it will be treated like built-in fields. It can be displayed in CrossVideo\_List and CrossVideo\_Detail sub modules.

Note, while “Admin control panel – Data Manager – Attributes” feature can also be used to create text/html filed, we don't recommend you do it. Instead, we recommend use additional fields in “Admin control panel – Data Manager – Galleries” feature. (See section 7.5).

Update

Cancel

Return my account

Attributes are used to create inter-dependant product variations. After creating an attribute, you can then create specific attribute value:

For example, if you want to create a "Color" attribute, you can do it as followings:

1. Input "Color" as "Field Name",
2. Input "Enter Color" as "Field Title" (optional).
3. Input "Enter a color,like red,green,white" as "Help Text"(optional).
4. Click "Update"

Then author will see a "Enter Color" field while edit products. He can specify its value for each product (eg. "White").

You can also provide a list of value to let author choose. For example, if you input "red,green,white" as "List of Values", then author can  
"red", "green" and "white". You can even specify a default value. For example, if you input "red" as "Default Value", then "color" value will  
doesn't change it.

Field Name

Field Title

Data Type

## 7.7: Other detail information

We provide as detail as possible information for every fields via DNN standard help label. Whenever you feel confusion, click the left help button of field, you will see more detail information. Like below:

 Video/Audio File:

Choose video file(.flv or mp4). You can select video from your files. Or add from external url, for example, <http://www.dnnmodules.cn/portals/0/test.flv>. You can also type youtube url as external source, for example, <http://www.youtube.com/watch?v=0kgLsSxGsU>. Besides that, you can add video from embed code. Nearly all video sites offer these embed code.

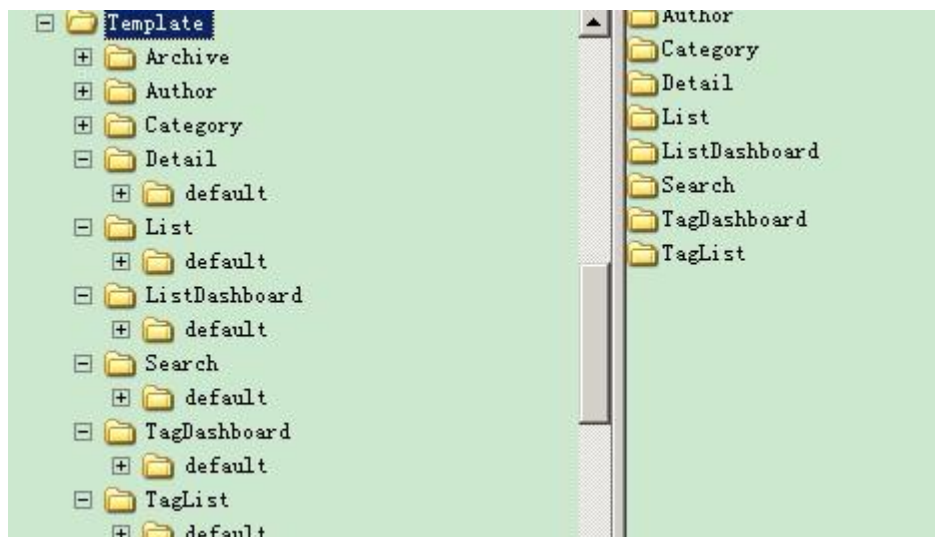

## 8. How to write templates

There are 12 sub modules in Cross Video Gallery package. Besides CrossVideo\_Admin sub module (which used to manage data), the other 11 sub modules are used to display data and they are all template based, you can customize your desired display effect by create different templates.

### 8.1 Templates are ascx files

All the templates are ascx files. To write a template, you need to be familiar with asp.net syntax.

### 8.2 Template directory structure

Template files should be put under related directory.

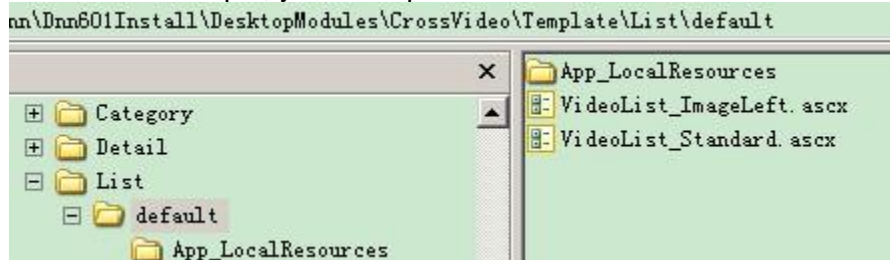

### 8.3 Template create steps

Take video list template as example.

1. Create a folder under DesktopModules\CrossVideo\Template\List directory, name it as MyList , for example.
2. Copy DesktopModules\CrossVideo\Template\List\default\App\_LocalResources directory and DesktopModules\CrossVideo\Template\List \default\VideoList\_Standard.ascx file to MyList folder.
3. Change VideoList\_Standard.ascx file name as your wish, for example, MyList.ascx. Of course, you can keep its original file name if you wish.
4. Open MyList.ascx file via Visual studio 2008 or something else, change its content. Note, you need to be familiar with asp.net syntax before change it.
5. Add CrossVideo\_List module instance to page, click “Media list settings”, in “General – template”, select “MyList.ascx”.
6. Now module will use your own template to display.

Of course, you can put your own templates under DesktopModules\CrossVideo\Template\List\default directory if you like.

We have put two templates under DesktopModules\CrossVideo\Template \List \default as example, you can open them to see more detail.

Tips: module provides a method – GetUDFieldValue to let you get customize attribute values in CrossVideo\_List sub module template. This method is very helpful if you want to show customize attribute in your media list template.

Its signature is `protected string GetUDFieldValue(string fieldName, string videoId)`. For example, if you create a “color” attribute in “CrossVideo\_Admin sub module – Admin control panel – data manager – attributes”, you can get its value for an video (suppose its id is 10) as follows:

`GetUDFieldValue(“color”, “10”)`

This method (GetUDFieldValue) also available in CrossVideo\_Detail sub module template. However, its signature becomes as `GetUDFieldValue(string fieldName)` in

CrossVideo\_Detail module template, doesn't need videold parameter.

For more information, please see our forum ( <http://DnnModule.com/> ).

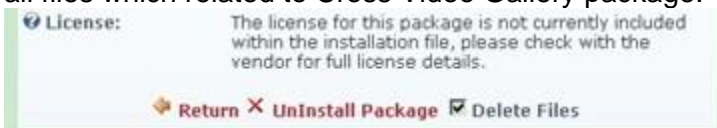

## 9 Uninstall module

We recommend you follow below steps to uninstall Cross Video Gallery package.

1. Click "Host - Extensions ", click the  button to uninstall CrossVideo\_WatchHistory ..... to CrossVideo\_Archive module one by one

 	CrossVideo_Admin	Manage all data which related to Cross Video Gallery module.	5.1.0	Yes
 	CrossVideo_Archive	Display media archive history.	5.1.0	Yes
 	CrossVideo_Author	Display video/audio authors	5.1.0	No
 	CrossVideo_Category	Display video/audio categories	5.1.0	Yes
 	CrossVideo_Detail	This module is used to display video/audio detail.	5.1.0	Yes
 	CrossVideo_List	Display video/audio list.	5.1.0	Yes
 	CrossVideo_ListDashboard	Display video/audio list dashboard via flash.	5.1.0	No
 	CrossVideo_Search	Provides search interface for cross video gallery module.	5.1.0	Yes
 	CrossVideo_TagDashboard	Display video/audio tag list via flash.	5.1.0	Yes
 	CrossVideo_TagList	Display video/audio tag list.	5.1.0	Yes
 	CrossVideo_Type	Display media department(media type) list.	5.1.0	Yes
 	CrossVideo_WatchHistory	Display user video/audio watch history.	5.1.0	Yes

2. When uninstall CrossVideo\_Admin module, check on "delete files" option to delete all files which related to Cross Video Gallery package.

## 10 More help information

We provide many detail help information on CrossVideo\_Admin sub module, login in as site administrator and expand "Help" section you will see it.

## 11 About Us

[DnnModule.com](http://DnnModule.com) is built to provide quality modules and skins, some of them are free, some not. We wish these stuffs (free or not) can be useful to you. Following are part of our released modules:

Cross Video Gallery 6.4 – dnn 7.x video/audio/youtube module

Cross Article 7.5 – dnn 7.x news article & blog module

Classified Pro 7.9 – dnn 7.x store/auction/classified ads module

Cross Bulk Mailer – the best email marketing module for dnn 7.x

Cross Photo Gallery 5.7 - dnn 7.x photo & Flickr & Picasa module

Ultra Flash Player 7.7 (21-in-1)

Ultra Image Slideshow 4.7(24-in1)

Silverlight Photo Gallery 5.

Silverlight Carousel Magazine 4.0

Visitor tracking plug-in 4.1 (Google Analytics and Ms Bing, free)

Flash Media Gallery 3.7 for dnn

## 12 Support

You can visit our support forum at <http://DnnModule.com/Forum.aspx> or mail to [xiaoqi98@msn.com](mailto:xiaoqi98@msn.com) for directly help.

## 13 Acknowledgments

Video convert engine are based two GNU projects:

1. ffmpeg at <http://www.ffmpeg.org>
- 2 . MPlayer at <http://www.mplayerhq.hu/>

We learn a lot of from below modules while developing this module:

1. Silverlight file upload module from Michael Washington
2. DNN official module - Form and list

## 14 Faqs

A. How to upgrade from trial version to official version?

Q. Simply re-install official version to overwrite existing trial version, module will keep your existing data after upgrade.

A. How to register my module?

Q: If you bought standard edition of Cross Video Gallery module, you need register your copy by provide your invoice id. As follows:

1. In "CrossVideo\_Admin" sub module, click "Register Cross Video Gallery Module", enter your invoice id, and click "Register".
2. If you install module on test site, don't register it.
3. Unregistered copy of standard edition can only add up to 50 video/audio items.
4. Enterprise edition and enterprise + source edition don't need register.

A. The captcha image doesn't show in media detail, how to solve it?

Q: It occurs in some dnn version with asp.net 4.0, check dnn forum at <http://www.dotnetnuke.com/Resources/Forums/tabid/795/forumid/190/postid/394250/scope/posts/Default.aspx#394250>. to see how to fix it.

A. Why the video detail doesn't display correctly?

Q: In CrossVideo\_Admin sub module, click "Data Manager – Gallery", check its "detail page" settings. That page must have a CrossVideo\_Detail sub module instance on it and its "media gallery" settings must be the same as current gallery. You can click the "Run type detail page settings wizard" to configure it.

Q: I want to approve videos/audios before display, how can I do that?

A: Click "CrossVideo\_Admin module - Admin Control Panel - Configurations - Global Settings", then check on "General - Approval media before display" option.

Q: Why I can't watch my videos using iPhone/iPad?

A: Make sure your video is h264 (.mp4) format. Currently there is no way to play .flv videos in iPhone/iPad.

Q: I don't want to author attaches documents (images) to his videos/audios, how can I do that?

A: Click "CrossVideo\_Admin module - Admin Control Panel - Configurations - Global Settings", you will see "Enable attach documents/ Enable attach images" options under "General" section, uncheck them will hide related functions. For example, if you uncheck "Enable attaches images" option, then "add related images" button will disappear while author edit his videos/audios.
